## Letter of Recommendation

I am writing this letter in support of Renu and her desire to join your university for her masters in computer science. Renu has worked with us for our website development and during her tenure here, she made some really amazing developments in our online portal.

As a software developer, she created user interfaces for our website, analyzed, and created features using various technologies. Renu has worked really hard in keeping up with our reputation as leading service provider and has grown our client base exponentially through her efforts. She is a disciplined and talented person who has proved herself dependable as well. She is observant, dedicated and quite skilled as she is able to explain the technical stuff to us who are not technologically advanced. Earlier, the domain of developing was considered a very exclusive one, but thanks to Renu that we were able to bring simplicity and efficiency in the same plate.

I strongly recommend Renu for the graduate school in your university as I am sure that university can give her the right kind of exposure. Having a person like Renu in one's team is an asset and I am positive that you will also find her to be a precious addition to your university. In the case of any doubts or queries, you can contact me at the below-mentioned email address or phone number.

Sincerely,  
Nazrul
